	How to make remote switches for TC2290, TC1128, TC1280 & TC1380	**2290-apn.04**

Below is shown a schematic for suitable 5-switch remote for the products mentioned above.

The switches shall be momentary types (non-latching),
Resistors shall be 5%/0.25W, available in any radio-parts/ electronics shop.

Any of the keys can be omitted.
Several remotes can be paralleled.
Max. cable lenght w/ properly shielded cable: >100m
*TC1280: Bypass / TC1380: No function
